

Labelling gripper G-102

The G-102 gripper is a labelling solution designed for collaborative robotics.

Applications

- Application of labels on multiple sides.
- Application on static or moving products.
- Application according to product size.
- Adjustment of the gripper to the plane to be labelled.
- Application and scanning of the label.

Operation

- Communication and control with the UR range of robots.
- Vacuum and blowing activations.
- Checks for label presence and correct vacuum operation.
- Compatibility with CAB HERMES Q printers.
- Optional: barcode reader.

TECHNICAL SPECIFICATIONS

Details

	G-102 gripper
Maximum label width	102 mm
Maximum label height	128 mm
Clamp weight	1,65 kg
Robot compatibility	UR
Printer compatibility	CAB HERMES Q
